TIME: 8:20am

Dear Atty. Chu:

This has reference to the compliance evaluation conducted by our technical staff for the project, Construction of Three-Storey School Building No. 5 for RTR Medical Foundation, Inc., issued with an Environmental Compliance Certificate (ECC-08-050804-0180) on August 19, 2005. As per evaluation, the following findings were noted:

1. Wastewater Discharge Permit has not been secured yet for the domestic wastewater generated from the comfort rooms that is connected to a septic tank serving as the wastewater control facility.
2. No Environmental Compliance Certificate (ECC) issued for the entire school.

In this regard, please be advised to secure Wastewater Discharge Permit for the entire school for the wastewater generated and likewise secure ECC covering the entire school. Also, kindly secure Permit to Operate Air Pollution Source and Control Installations for any provision of a generator set with a capacity greater than 15 KW as well as to register as hazardous waste generator for the hazardous wastes generated such as busted lamps, etc. For permit applications, kindly access thru [opms.emb.gov.ph](http://opms.emb.gov.ph) while [ecconline.emb.gov.ph](http://ecconline.emb.gov.ph) for ECC applications.

For your compliance.

Very truly yours,

*[Signature]*
