Dear ma'am:

Environmental greetings!

Following the latest IPCC Assessment Report on Climate Change, it is becoming more and more apparent that the phenomenon is posing a serious threat to the planet if no significant action is taken. One necessary step in climate change mitigation is to quantify and account the greenhouse gasses being emitted by different sectors in order for the government to undertake in more informed and data-driven actions.

In reference to this, the commitments to the operationalization of the country's Nationally Determined Contributions (NDC) and implementation of the Executive Order No. 174, Series of 2014, the responsibility was given to the Environmental Management Bureau to conduct the data collection for the development of sectoral greenhouse gas inventory—Industrial Process and Product Use (IPPU) and Waste sector. As one of the identified establishments covered under the IPPU sector, we would like to request for the following set of data from the operationalization of your establishment in the years **2015** and **2020**:

Data	2015	2020
Total annual production (mass/ weight/ volume) [tons]		

In line with the deadline prescribed by the Climate Change Service (CCS) central office, we are hoping you could provide the said set of data within **May 2022**. Rest assured that the data will be kept strictly confidential and will only be used for the said matter.

For further queries and clarification, you may contact Selwyn Ian R. Panis at the email address selwyn_panis@emb.gov.ph, and mobile number, 0926-590-1028. You may also send the requested data to the same email address.

Respectfully,

ENGR. REYNALDO B. BARRA

OIC-Regional Director
